Introduction

The University College of the North (UCN) conducts the Graduate Satisfaction and Employment Survey on an annual basis. The survey collects information from graduates to determine their employment status, as well as their level of satisfaction with the education received at UCN. This report contains the results from students who graduated during the 2010/2011 academic year. Further analysis was conducted for various faculties; Arts and Science, Business, Education, Health, and Trades and Technology.

Scope of Survey

The University College of the North surveyed 440 graduates from the 2010/2011 academic year; 410 from UCN’s degree, diploma and certificate programs; and 30 from the Baccalaureate Nursing Program (joint degree program; University College of the North / University of Manitoba). Graduates from the apprenticeship programs are not included in this report.

Methodology

All graduates of the 2010/2011 academic year were selected to participate in the survey. A personalized cover letter was sent out to each graduate informing them a survey was forthcoming, which was followed by the survey. Students were given an incentive to win one of five prizes if their responses were received by December 15, 2011. Follow up with non-respondents was done by telephone to improve response rates.

Response Rates

The following table will summarize responses by certificate, diploma and degree programs. Response rates are calculated on the total number of responses received from all graduates of the 2010/2011 academic year.

A large percentage of graduates had out of date contact information (31%), which was a large contributor to the 30% response rate. This report has a margin of error of ±7.1% with a 95% confidence interval.
